ARK70 *Track*

ARK70 is a modular architectural lighting system defined by a refined 70x70 mm folded steel profile, designed to create large rectangular geometries softened by elegant corner joints with a 45 cm radius. Its minimal U-shaped structure integrates a Eurostandard track, allowing projectors and linear elements to be combined seamlessly, in both ON/OFF and dimmable configurations. Fully customisable in finish, ARK70 fits naturally into sophisticated residential, retail and hospitality settings. Clean geometry, discreet joints and balanced proportions enhance the purity of the design, highlighting the quality of the light. Available in both suspended and surface-mounted versions, ARK70 turns technical light into a precise architectural statement.

PENDANT	CLASS I	Integrated DRIVER

GENERAL

Category	Track
Environment	Indoor
Installation	Suspension/ceiling

ELECTRICAL

Driver	On board the spotlight
Power supply	220-240Vac
Insulation class	I

MECHANICAL

Dimensions	See drawing
Weight	4kg/m
Finish	GANI RAL797
Material	Iron
