LKE – LUCENOVA KNIFE EDGE *Linear luminaire*

The LKE (Lucenova Knife Edge) system is a linear architectural lighting solution made of extruded aluminium linear profiles and curved MDF profiles. Designed to create indirect light slits and blades, it is ideal for high-end living areas, hotel lobbies, executive offices, corridors and commercial spaces, creating the effect of "floating" false ceilings or minimalist architectural niches. The profiles are integrated directly into the plasterboard sheets: once filled and finished, they leave only an extremely thin, clean "blade" detail visible. They conceal the linear light source, reflecting light evenly upwards and along the perimeter. The system also allows the integration of adjustable spotlights for directional accent lighting.

LINEAR	IP 20 PROTECTION	120° BEAM

GENERAL

Category	Linear luminaire
Environment	Indoor
IP rating	IP20
Installation	Integrated in plasterboard

MECHANICAL

Dimensions	See drawing
Weight	1.662kg/m
Finish	Aluminium
Material	Aluminium

OPTICS

Emission	Indirect
LED source	LED strip
Distribution	Uniform and reflected
Optics	Opal diffuse
Beam angle	120°

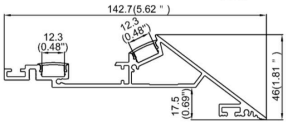

NOTES

- Connectors available at 90° and 180°, end cap.
